

## Battle Wrap - V7 (Case of 10)

The Battle Wrap® is a clear, non-slip, tear resistant, tactical compression wrap that allows visualization of bleeding, while providing circumferential pressure to the wound. Battle Wrap is extremely strong, self-adhering and ultra-thin; when used in conjunction with a hemostatic it can amplify a pressure dressing application.

Battle Wrap® is a high-performance compression wrap for use as an adjunct in hemorrhage control. It is transparent to allow full visualization and rapid reassessment of underlying wounds. Battle Wrap is strong and exceeds the holding power of traditional compression wraps and does not shred or delaminate in the most challenging environments. The medical grade adhesive is self-adhering, non-irritating and leaves no residue on the skin.

### Product description

- TRANSPARENT for rapid reassessment
- STRONG and flexible for quick application
- SELF-ADHERING and non-slip; no clips or ties required
- 6-foot roll packs with minimal cube
- Leave no residue on skin
- Self-adhering and non-slip. No clips or ties required
- Tested to 5000psi tensile strength, 550% elongation at break
- Clear, flexible, extremely strong
- Visibility allows for rapid wound reassessment
- Provides optimal pressure to wound
- Simple application ensures proper use by responders of any skill level
- Unique adhesive properties are non-irritating and do not leave residue on skin
- Protects the wound and exposed skin from external contaminants

### Specifications

- NSN: 6515-01-612-8229 (Box of 10)
- PN/SKU: 02-001
- UI: CS
- FDA Listed, ISO 13485 and cGMP Compliant
- Single use
- Exceeds MILSTD 810G for Temp Tolerance
- 150 micron clear polymer
- Not made with natural rubber latex
- Available Direct, Prime Vendor, ECAT and GSA
- 100% TAA Compliant
- Shelf life: 6 years
- Made in USA

### Unit Dimensions

- Packaged: 4.5" x 1"
- Useable: 6' x 4"
- Unit Weight: 1.7 oz
