

Fox Seal (Pack of 2)

FoxSeal™ is designed for simple, consistent performance in the field as a tool in the prevention and treatment of pneumothorax. Its advanced adhesive ensures its reliability in extreme conditions and works on either wet or hairy skin.

FoxSeal™ is a compact size and fits neatly in Individual First Aid Kits eliminating leaks from creased dressings that are stored folded. Each package contains two seals allowing for treatment of both entry and exit wounds if needed and is non-vented. Each seal is designed with easy-grip tabs and re-sealable adhesive, enabling the chest to be vented if needed.

Product description

- Strong adhesion & reliability in extreme conditions
- Works on wet or hairy skin
- Compact size
- Product Attributes
