

MOJO™ Dart Thoracostomy Needle - 14 GA, 3.25" (Thoracic Decompression)

The MOJO™ Dart™ gives providers at any skill level the confidence and capability to perform reliable chest decompression and improve outcomes for casualties with a tension pneumothorax, the third leading cause of preventable traumatic death.

The MOJO™ Dart™ is a sterile, 14 gauge x 3.25" needle with a uniformed, thick walled catheter. The design minimizes risk of catheter collapse in the intercostal space. The sure-grip hub ensures stability in difficult environments. The rugged case was designed for easy, one-handed opening and doubles as a sharps container for patient and practitioner safety.

The Dart's™ six-year shelf life lowers lifecycle costs when compared to most chest decompression needles.

Product description

- Designed with rugged case, sure-grip hub, and thick-walled catheter
- Minimal Risk for additional decompression attempts
- Improve outcomes when treating tension pneumothorax
- Ergonomic sure grip hub:
- Easy to use in difficult environments
- Easy grip with gloves
- Snug fit in case – no falling out
- Thick-walled, uniform catheter
- Patented sterilization plug
- Case doubles as a sharps container
- Fits in a military IFAK
- Low volume, low cube
- Clinical Benefits
- Improves outcomes when treating tension pneumothorax, the third leading cause of preventable battlefield death1
- Catheter design minimizes risk of clogging, kinking and need for additional decompression attempts
- Easy access case for quick use and safe needle disposal
- Purpose built decompression needle, not a re-purposed IV Catheter
